

WHY DO ACCOUNTANTS & BOOKKEEPERS USE A2X?

A2X will help make your Amazon accounting accurate and easy
Eliminate manual Amazon bookkeeping and data entry
More time to focus on big-picture strategy with clients

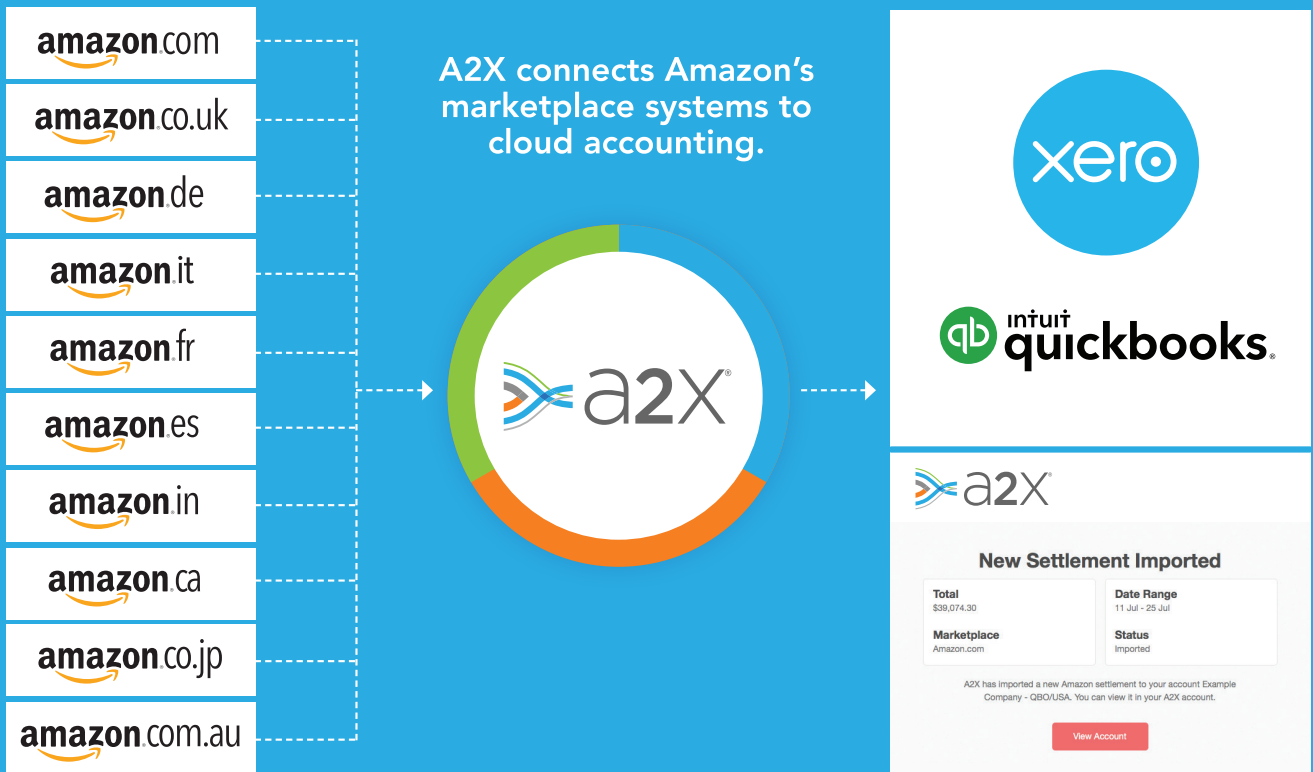

- **Accurate Reconciliation.** A2X will reconcile down to the penny month after month and year after year.
- **Settlement history.** A2X can load settlement history as far back as Amazon allows. A clean set of books can be achieved for your clients.
- **Accounting Expertise.** Demonstrate your Amazon accounting expertise by setting up a free trial for potential clients quickly and easily.
- **Easy Client Management.** Group your staff into teams and assign these teams to your A2X subscriptions.
- **Full visibility.** A2X allows easy full visibility of all the fees that Amazon is charging, including storage, transportation, commissions and delivery.
- **Accurate international marketplace accounting.** A2X posts foreign currency transactions correctly and adjusts for local sales taxes. With A2X your clients can expand internationally with confidence.
- **Customize your A2X.** Map Amazon transactions to your preferred chart of accounts and then choose the level of aggregation. Customise it for as many clients as you like.
- **Partner Program.** Join the free A2X partner program to help your business grow: Training, Priority Support, Partner Pricing, Co-marketing Opportunities.

“This tool takes one of the biggest challenges of Amazon finances and solves it so efficiently and so reliably, that we were able to build a business model around it. That’s how special and powerful this software is.”

Jeremiah Kovacs - Owner of MuseMinded

How it works

Connects to Amazon marketplace systems. Multi-currency for marketplaces worldwide.

Monitors the Amazon merchant account. Loads settlement transactions, sales, refunds, commissions, storage fees and all other adjustments.

Allocates transactions to financial periods. Auto post summarized journals and COGS to accounting ledger. Reconciles to the bank account, down to the penny.

COST OF GOODS SOLD

Match sales to inventory costs

A2X calculates the cost of stock sold during a settlement period and matches costs to sales in your accounting system.

Accurate gross margin

Cost of goods sold matched to marketplace sales means more accurate gross margins in your financials.

FBA INVENTORY VALUATION

Know your FBA inventory value

Don't waste time downloading FBA inventory data. A2X will automatically calculate FBA stock each month.

Where's your FBA stock?

FBA moves your stock frequently. A2X identifies the locations, countries and states where your stock has been stored, and since when, for tax purposes.
